

ORACLE HYPERION APPLICATION REVIEW

Fact Sheet

Does your Oracle application need a health-check?

Concentric Solutions offers an expert application review service for clients running Oracle's EPM software solutions. This service is designed to provide an independent report of findings and recommendations that helps administrators optimise the configuration of their applications.

SERVICE OUTLINE

Our Application Review service provides an independent health check for your Oracle Performance Management software applications.

It brings together our technical experience and your business process needs, resulting in recommendations that optimise the efficiency of models and allow clients to adopt best practices.

DELIVERABLES

- Assessment of current business processes
- Validation of application design
- Review efficiency of model
- Review of data integrations
- Guidance on support, maintenance and development policies
- Report of findings and recommendations
- Knowledge transfer to administrators

APPLICABLE PRODUCTS

- Hyperion Enterprise
- Hyperion Financial Management
- Hyperion Planning
- Hyperion Essbase
- Hyperion Financial Data Quality Management

SERVICE DETAIL

The Application Review service compares your company's current application designs against our knowledge of best practices. A Senior Consultant will review your company's EPM solutions, suggest methods of improving the design and execution of the model, and assess its alignment with your business processes.

Our Hyperion trained senior consultants each have an average of fifteen years' experience in Oracle Hyperion Performance Management solutions. This detailed product understanding enables us to recommend design choices that best fit your specific business needs.

This comprehensive service typically involves a fixed cost package of three to five days consultancy and includes a review of the following:

- Data process flows and cycle times
- Application setup parameters
- Meta-data structures
- Business rules and system logic
- Data integration, data quality and automation
- Production reporting
- Ad-hoc reports and analytics
- Security
- System maintenance, updates and development policies
- Internal control risks
- License compliance
- System and user documentation

ABOUT ORACLE

Oracle Enterprise Performance Management (EPM) helps you model and plan across finance, HR, supply chain, and sales to drive better decisions while supporting a broad range of strategic, financial, and operational management processes.

At the heart of Oracle's EPM solution, Oracle Hyperion Planning supports planning, budgeting, and forecasting tasks. Oracle Hyperion Financial Management helps organisations consolidate and report on financial and operational performance.

The latest version of Oracle Hyperion for on-premises deployments is 11.2, which is positioned as the long-term support release. The solution is supported until at least 2033, providing ongoing updates and improvements, addressing issues and enhancing functionality.

READY TO MOVE TO THE CLOUD?

As part of our application review we can take into consideration a cloud migration strategy and timeline - speak to consultants to discuss your options for adopting a cloud-based solution.

ABOUT CONCENTRIC

Concentric was formed in 2005 with a vision of delivering better business analytics. We are experts in transforming financial and operational data into meaningful insights to help our customers improve their global business performance.

Using deep domain knowledge, we implement Enterprise-class applications for multi-national companies to optimise financial and operational reporting processes including:

- Financial Close & Consolidation
- Account Reconciliations
- Planning, budgeting & forecasting
- Statutory & Management Reporting
- ESG Reporting

Our customers range from SMEs to FTSE100-scale organisations across a variety of industry sectors, including Transportation, Automotive, Manufacturing, Engineering, and Aerospace.

Based in the UK and Europe, our team is a blend of qualified accountants, vendor-trained consultants and skilled IT professionals.

We offer a full range of services from advisory and education, to solution delivery, platform support and managed services. Our solutions empower the Office of Finance, enabling them to meet reporting requirements and become key advisors on the company's strategic objectives.

BOOK YOUR HYPERION SOLUTION REVIEW

Protect your investment in Hyperion software by relying on the services of our award-winning team. Our consultant will work in collaboration with your Finance department, the system administrator and IT contacts ensuring the provision of appropriate Hyperion-specific application guidance and enabling your company to maintain and develop a robust and scalable application.
